You are invited to participate in a research study. Your participation is voluntary. This document explains information about this study. You should ask questions about anything that is unclear to you.

PURPOSE

The purpose of this study is to develop a benchmark to measure antisemitic bias in artificial intelligence models. This survey will collect input from members of the Jewish community on what stereotypes and biases are undesirable in AI models. We hope to learn whether common AI models encode antisemitic biases and develop a method to mitigate these biases. You are invited as a possible participant because you

are an English-speaking adult who identifies as Jewish.

PARTICIPANT INVOLVEMENT

If you decide to take part, you will be asked to fill out an online survey about your identity and experiences with antisemitism. The survey will take 7-10 minutes and will include a mixture of multiple choice and free response questions. The survey will ask about your past experiences with antisemitism. These questions may be uncomfortable or difficult to answer. You should only enter as much information as you feel comfortable sharing. You are free to skip questions or leave the survey at any time.

CONFIDENTIALITY

The members of the research team and the [REDACTED] Institutional Review Board (IRB) may access the data. The IRB reviews and monitors research studies to protect the rights and welfare of research subjects.

Your survey response will be anonymous, and we will not ask you for any personally identifying information (PII). If you enter PII in one of the free response fields in the survey, that information will be redacted before data analysis.

Your survey responses will be used to develop a benchmark dataset, which will be publicly released on GitHub, a code-sharing platform. Short excerpts of your free text responses, including quotes and paraphrases, may be included in this public dataset. No part of the dataset will be tied to your identity.

Biases, Stereotypes, and Harms

This section of the survey asks you to describe harms you have experienced from hearing or seeing antisemitic language. You are free to skip any questions or the entire section. You are free to leave the survey at any time.

For purposes of this survey, “harm” includes all of the following:

- emotional and psychological discomfort
- physical violence
- discrimination
- bullying and cyberbullying
- adverse material or financial impacts
- loss of personal or professional opportunities
- any other kind of incident you experienced as harmful

For each of the following stereotypes about Jewish people, please rate whether you view them as positive, neutral, or negative, then check the box if this stereotype has ever been

applied to you in a harmful or insulting way. Stereotypes listed are drawn from previous responses to this survey.
